## Introducing Gather.Town

**CERF will be using Gather.Town for poster sessions and networking**

Gather.Town is a web-based video calling experience and virtual space for people to interact.

This virtual space combines video-calling with a 2D map that lets you walk around and talk to the other people right next to you, as well as view videos and documents.

## Interacting with the Map

### Private Spaces

Private Spaces are marked by darker tiles, or circles. When you enter a private space, a notification will pop up and only people in the space will be able to hear and see you.

### Interactive Objects

When you walk by an object and it lights up, press x to interact.
